

Specialist Certificate in Logistics Operations

A joint training collaboration between PMAS & TLA

Overview

Besides providing for an alternative pathway to bridge to the Specialist Diploma programmes, it also equips the applicants or prospective learners with the foundational skills (at entry level) necessary to perform competently in the logistics & freight forwarding sector.

This programme is particularly useful to understand the fundamentals of logistics and supply chain management. It enables learners to have an insight into the overview of the logistics business. It provides essential concepts on managing transportation, inventory as well as flow of goods and resources into a global marketplace.

Learners would appreciate how deployment of technologies could enhance the efficiency of logistics processes. When business witnesses growth, one must find ways to streamline logistics planning processes for improving output.

Coverage

- Warehouse Operations
- Fundamentals of Transport & Freight
- Purchasing & Inventory Management
- Fundamentals of Logistics IT
- Logistics Safety & Legal Issues

I have 10 years of working experience in the warehouse. This course helps me to understand the overall process in the supply chain management and how to be an effective warehouse personnel in planning the process well. I also learn new knowledge on transportation which is not within my work scope. Thank you to the lecturers concerned who made the learning so enjoyable.

*G.Prabhakaran A/L Ganasan
Warehouse Assistant, Winston
Engineering Corpn (Pte) Ltd*

From our participants who attended ...

Before this course, I was not aware of the different contracts between buyer and seller. After the course, I can know in depth on the various areas in Warehouse and Inventory Management. I can also actively take part in the planning and discussions on the warehouse improvement in my company and give suggestions based on what I learnt during the course.

Low Kay Hwee, Warehouse/ Logistics Assistant, DEIF Asia Pacific Pte Ltd.

Designed For

- Entry-level logistics officers/executives/ co-ordinators
- Practitioners (good years of experience in the industry, but without the academic qualifications) seeking to upgrade themselves in the vocational pathway

Lecturer

Thomas Sim is the Group CEO of International Freight Consultants (S) Pte. Ltd. He is the 2nd Deputy Chairman of the Singapore Logistics Association and chairs its Training & Development Committee and the Academic Director of The Logistics Academy. With Thomas's extensive knowledge and working experience, he is able to impart valuable industry knowledge to the trainees.
